

Drivers Training Institute- NCVRS

NCVRS-Rae Bareli is proposed to host state of art Drivers Training Institute. The institute will involve in training of drivers. The training involves various phases which are as follows:

- 1) The first phase of training will be given on world class Driving Simulators, which has virtual cockpit and simulate the real driving experience in safe conditions.
- 2) After having good hand on simulated environment and knowing the driving conditions the candidate will trained on real vehicle on specially designed tracks, which has wet and dry sections curves of different radius, breaking area and slalom sections., which creates the full scientific environment of driver training.

This complete training leads to create well verse drivers which are capable to handle the vehicle in different road and environmental conditions and equally well known the rules and regulation of Driving. The centre will be equipped with following training facilities:

- a) **Driving Simulators.**
- b) **Training tracks.**
- c) **Training Vehicles.**
