

Powertrain Lab- NATRAX

The Powertrain lab at NATRAX- Indore has vehicle test cell consist of Chassis Dyno. which is copulated with emission measurement system. The complete system is used for benchmark, deterioration and engine performance test as well as R&D, as the vehicle are runs on different test tracks while testing endurance/ live performance. The lab is capable of both homologation and R&D in complement of test tracks at NATRAX. The facility is capable of testing emission norms up to Euro-5.

Vehicle Test Cell (Chassis Dyno.)

Emission Analyser

Technical Details Powertrain Lab At NATRAX

Capability Name	Component	Application	Test Capability	Specification	Fuel Type
Vehicle Test Cell for emission	CD1 Analyser	PC+LCV	Euro V+ R&D	150 KW, 48 ⁰	Gasoline
	CD2 Analyser	PC+LCV	Euro V+ R&D	150 KW, 48 ⁰	Diesel
